[a] The figures for 1841, as published in *Gazette*, are full of errors which cannot now be corrected, and should therefore be used with great caution.

[b] The figures (Persons) for 1847 include 2246 military, women, and children; also 3739 male convicts on public works.

[c] „ „ 1851 „ 953 „ „ „ „ 568 convicts, sex not distinguished.

[d] „ „ 1857 „ 630 „ „ „

[e] The discrepancy in the number of brick and stone houses in 1870 and 1881 arises from a large number of residents in country districts failing to give definite descriptions

[Compiled by Government Statistician from Returns supplied by the Customs Department.]

* The corresponding numbers to and from, as ascertained by the Customs Departments of the various States, are so utterly irreconcilable that it has been deemed more desirable to take the departures as ascertained by our own Customs Department than to base the statement of migration upon the compilations prepared at State and Foreign ports of arrival or departure. Owing, however, to the completely insular character of Tasmania as a State, conclusions drawn in respect of increase or decrease to population are less liable to error than similar conclusions drawn in respect of each State of Continental Australia. As regards migration seaward, it must be borne in mind that it is more than probable that the figures given independently by each State are equally and indefinitely erroneous within certain limits, and therefore it is unwise to assume that the differences shown between the statements of two States afford any reliable index to either the extent or direction of the divergence from the truth.

† Estimated to be understated by about 13·45 per cent.

MEAN AND EXTREME RESULTS FOR THE YEAR 1902.

From Observations taken at Hobart.

Barometer (corrected to 32° Fahrenheit, and reduced to Sea Level)—

Highest reading	30·639 inches on 2nd June.
Lowest ditto	28·991 „ on 19th June.
Range for year	1·648 inches.

Thermometer—

Radiation, Solar, maximum	148·0° on 26th January.
„ Terrestrial, minimum	20·0° on 19th May.
Maximum in shade	97·0° on 2nd February.
Minimum ditto	28·8° on 17th July.
Range for year	68·2°.
Highest mean temperature for one month	60·7° in January.
Lowest ditto ditto	44·9° in June.

Humidity—

Highest mean for one month (saturation = 100)	87% in June.
Mean for the year	72%.

Condensation—

Total for year	21·85 inches.
Total number of days rain fell	151.
Maximum for one month	3·73 inches in September.
Minimum ditto	·51 „ in July.
Maximum fall in 24 hours	1·36 „ on 11th September.

* On the 9th October, 1901, trade between the States of the Commonwealth became free, with the exception of Imports into Western Australia. The Government of Western Australia has the power, under the Commonwealth Constitution Act, to levy duty, on the produce of other States of the Commonwealth, at the rates existing under the laws of Western Australia at the time of the imposition of uniform duties, such rates of duty to be decreased by one-fifth in each succeeding year until, at the expiration of the fifth year, all duties on Interstate goods shall cease. The rates of duty shown in this table would be in force until the 9th October, 1902, from which date they would be one-fifth less.

* See Imports, pp. 166 to 236 for fuller detail respecting each Order. † Nothing introduced so defined. ‡ This relative percentage is subject to modification in all cases where the quantity and value of Imports differ from the quantity and value of goods entered for Home consumption: owing to a very large proportion of Tasmanian Duties being collected in other States (Interstate Transfers), and recorded only under very wide revenue heads, the apportionment of the Duty for this year can be taken only as roughly approximate.

* Not including claims. Worked under Miners' Rights. † Cannot be specified.

[There being no Statistical Staff connected with the Mining Department in Tasmania, as in the neighbouring Colonies, the figures have been kindly supplied by the Collectors of Agricultural Statistics. As some of the mines are only partially worked during the year, and many mining companies are unregistered, it is difficult to obtain anything approaching accurate information. Tin is worked alluvially and in lode, so that a correct division cannot be obtained. These figures must therefore be regarded as roughly approximate.]

NOTE.—This information is somewhat incomplete, owing to defective particulars furnished.

TRADES, MANUFACTORIES, AND OTHER INDUSTRIES.

With regard to the following industries, the aggregates are alone given, as it would not be desirable to localise information to Districts, thereby in many cases unnecessarily disclosing the extent of the business of private individuals or companies, as the case may be.

Unfortunately, the figures given by some establishments in respect of capital invested vary greatly year by year; such figures can therefore be only regarded as rough approximates

The enrolment of distinct Scholars cannot be ascertained under the present system. The method adopted by the Department is to take the number of children on the Rolls at any time during the year as the (gross) enrolment.

Since the abolition of payment for instruction of Free Scholars there has been no necessity for keeping a record of them and so under existing conditions the number cannot be given.

APPENDIX B. TO STATISTICS FOR 1902.

AUSTRALASIAN STATISTICS, 1902.

AUSTRALASIAN STATISTICS, 1902.

THE tables of Australasian Statistics which follow these introductory observations on the Progress of Australasia have been carefully compiled from Returns furnished by the Governments of the various States and of New Zealand. The general tables for each State contain a large amount of information conveniently arranged for reference and comparison. Additional tables have also been added for the purpose of giving fuller information on the important matters relating to Finance, Public Debt, Railways, and External Trade.

Progress of Australasia since 1830.

The following table has been specially prepared to show the general progress of Australasia over a longer period than that shown in the fuller tables restricted to recent years. The particulars selected are shown, as far as can be obtained, for the year closing each decade since the year 1830, and convey a bird's-eye view of the rapid progress made over the seventy-two years ending with the year 1902. The Annual Rate of Progress since 1850 and during the last decade are given side by side to mark the varying rate of progress in later years as contrasted with that for the greater period.

[5] Post and Telegraph Departments. [6] Population of Tasmania at time of Census, 31.3.1901, was 172,475, equal to 4·57 per cent. of the Total Population of the Commonwealth, which has been taken as 3,778,385. [7] Does not include Cost of Construction of 45¾ miles open for short time only in 1900, and in respect of which no particulars of working are given. [8] Including Telephones. [9] It is suggested by the Officers of the local Post Office that the decrease in letters and packets, as compared with immediately preceding years, is due to Regulations in regard to "Tattersall," and that the decrease in newspapers is due to increased postage rates. [10] Particulars regarding the working of the North Mt. Lyell Company's Railway for the year 1902 not having come to hand, the figures for 1901 have been used.

* NOTE.—As the Loans actually expended on Railways include a considerable amount for Lines not open for traffic, the percentage proportion to capital will be somewhat less than what it would be if reckoned in relation to *Capital expended on Lines open for traffic* only. The net burden on General Revenue, however, is more correctly indicated by the method adopted.

Proportion of Pensioners 65 years and over per 1000 persons 65 years of age and over	417	226	...	...	...	...	...	452

* With not more than five years' absence, continuous or otherwise. † Average for year.

A Commonwealth scheme to provide pensions to persons 65 years of age and over would, on the New South Wales scale, and allowing for the same proportion of pensioners as obtain in that State, require a sum of about £1,500,000 per annum, and on the scale of the New Zealand scheme a sum of about £930,000 per annum. The proportion of pensioners to persons 65 years of age and over would, however, be greater in the Commonwealth than in any individual State, for many persons who would not qualify for a State pension, as a resident of a particular State for 20 or 25 years, would be eligible as a resident of the whole Commonwealth, the time of residence of many having been passed in more than one State.
